Glossary of Terms and Column Headers

SY17 – school year spanning September 2016 to May 2017

SY16 – school year spanning September 2015 to May 2016

ISBE – Illinois State Board of Education

District – Illinois Public School Districts with Type Codes of 01-27 and State Charter Schools are included. Does not include private or specialized school districts.

Enrollment – sum of enrollment in all schools in district as of October 2016, as provided by ISBE. For schools with no October 2016 data, this column represents the highest enrollment month from available records.

F/R – eligible for free or reduced price school meals

F/R eligibility rate – # of students eligible for free or reduced price school meals divided by # of enrolled students. All numbers provided by ISBE.

CEP participation – Indicates if any school in district has elected to participate in the Community Eligibility Provision, which allows free breakfast and lunch to be offered to all students in high-poverty schools and districts.

Affected by Breakfast after the Bell legislation – Indicates if any school in district is required to serve breakfast as part of the school day per the Breakfast After the Bell legislation. Public schools in which at least 70% of the students were eligible for free or reduced-price lunches in October of the preceding year are affected by this legislation.

Percent of F/R students participating in school breakfast – sum of # of free or reduced-price students participating in school breakfast divided by the sum of # of free or reduced-price eligible students.

Percent of F/R school lunch participants that also participated in F/R breakfast – the average daily participation in free or reduced-price school breakfast divided by the average daily participation in free or reduced-price school lunch.

Average daily breakfast participation = # of free or reduced-price breakfasts served / # of breakfast serving days

Average daily lunch participation = # of free or reduced-price lunches served / # of lunch serving days

Percent change in F/R lunch participants that also participated in F/R breakfast, SY16 to SY17 – the difference between the % of F/R lunch participants that also participated in FR breakfast in SY16 and SY17 divided by the % of F/R school lunch participants that also participated in F/R breakfast, SY16

Additional students that would receive F/R breakfast if all schools in the district reach the Gap to 70% – The # of additional F/R eligible kids that would be served F/R school breakfast if 70% of all F/R lunch participants also participated in F/R breakfast.

Additional funding possible if Gap to 70% reached by all schools in district – The potential Federal and State dollars the school district would have received if 70% of F/R lunch participants also received F/R school breakfast depends on whether the schools within the district elected to participate in the Community Eligibility Provision and if they are classified as severe need.

In the case of CEP participating sites, the Free Claiming Rate and Paid Claiming Rate is calculating using the Identified Student percentages by site, available on ISBE's website.

- o Free Claiming Rate = Identified Student Percentage * 1.6
- o Paid Claiming Rate = 1 – Free Claiming Rate

In severe need schools, the SY17 reimbursement rate for free breakfasts was \$2.04, \$1.74 for reduced price breakfasts, and \$.29 for paid breakfasts. In non-severe need schools, the reimbursement rate for free breakfasts was \$1.71, \$1.41 for reduced price breakfasts, and \$.29 for paid breakfasts in SY17. An additional \$.025 for each free breakfast is automatically added as part of the Illinois Free Breakfast Program.

For severe-need schools participating in the Community Eligibility Provision, additional funding available if Gap to 70 was met = # of additional breakfasts to reach Gap to 70 X Free Claiming Rate X \$2.04 + # of additional breakfasts to reach Gap to 70 X Free Claiming Rate X \$.025 + # of additional breakfasts to reach Gap to 70 X Paid Claiming Rate X \$0.29

For non-severe-need schools participating in the Community Eligibility Provision, additional funding available if Gap to 70 was met = # of additional breakfasts to reach Gap to 70 X Free Claiming Rate X \$1.71 + # of additional breakfasts to reach Gap to 70 X Free Claiming Rate X \$.025 + # of additional breakfasts to reach Gap to 70 X Paid Claiming Rate X \$0.29

For severe-need schools, not participating in the Community Eligibility Provision, additional funding available if Gap to 70 was met = # of additional breakfasts to reach Gap to 70 X % Eligible for Free Meals X \$2.04 + # of additional breakfasts to reach Gap to 70 X % Eligible for Free Meals X \$.025 + # of additional breakfasts to reach Gap to 70 X % Eligible for Reduced Price Meals X \$1.74

For non-severe-need schools, not participating in the Community Eligibility Provision, additional funding available if Gap to 70 was met = # of additional breakfasts to reach Gap to 70 X % Eligible for Free Meals X \$1.71 + # of additional breakfasts to reach Gap to 70 X % Eligible for Free Meals X \$.025 + # of additional breakfasts to reach Gap to 70 X % Eligible for Reduced Price Meals X \$1.41

Technical Brief – 2018 Child Nutrition Report

School breakfast participation

The Illinois State Board of Education (ISBE) provided all raw data on site level enrollment, free and reduced price meal eligibility, Community Eligibility Status, school types, and monthly school breakfast and lunch participation. This report includes public schools that participated in the National School Breakfast Program in school year 2015-2016 and 2016-2017, with a focus on those that are affected by the Breakfast After the Bell Mandate.¹ Private schools, specialty schools, alternative schools, residential child care institutions, and other institutions are not included in this analysis. School enrollment is based on October of the pertinent school year.

This report estimates district-level breakfast participation rates by aggregating site-level participation. For each National School Breakfast site in Illinois, this report estimates how many eligible children that participate in the free or reduced price lunch program also participate in breakfast. By summing the total free and reduced breakfasts and lunches served and dividing by the number of serving days, we calculate the average daily participation in these programs. Schools electing to participate in the Community Eligibility Provision program as part of a group of schools are still analyzed as separate sites for the purposes of this report.

In alignment with the Food Research & Action Center (FRAC) and Share Our Strength, this report sets the benchmark of each National School Breakfast site reaching 70 out of every 100 students receiving free or reduced price lunches. After determining the “Gap to 70” for each site, we multiply this underserved population by a site-specific reimbursement calculation based on their participation in the Community Eligibility Provision program, severe/non-severe need status, and percentage of the student population that receives free/reduced/paid meals for non-CEP schools. This gives an estimate of the additional funding that may be available if the “Gap to 70” is met, with the assumption that all new participating students would mirror the free and reduce price eligibility patterns of the current site-student body.

Select key calculations

Average Daily Breakfast Participation = (Free meals + reduced price breakfasts served September through May)/ total days breakfast was served September through May

Free and Reduced Price Eligible Students Participating in School Breakfast Program per 100 participating in the National School Lunch Program = Average Daily Breakfast Participation / Average Daily Lunch Participation

Gap to 70 = # of additional breakfast participants needs to reach benchmark of 70 free and reduced eligible lunch participants also receiving breakfast.

Additional funding available if Gap to 70 was met

The potential Federal and State dollars the school district would have received if 70% of free and reduced breakfasts were served to eligible students depends on whether the schools within the district elected to participate in the Community Eligibility Provision and if they are classified as severe need.

In the case of CEP participating sites, the Free Claiming Rate and Paid Claiming Rate is calculating using the Identified Student percentages by site available on ISBE’s website.

o Free Claiming Rate = Identified Student Percentage * 1.6

o Paid Claiming Rate = 1 – Free Claiming Rate

In severe need schools, the reimbursement rate for free breakfasts was \$2.04, \$1.74 for reduced price breakfasts, and \$.29 for paid breakfasts in SY17. In non-severe need schools, the reimbursement rate for free breakfasts was \$1.71, \$1.41 for reduced price breakfasts, and \$.29 for paid breakfasts in SY17. An additional \$.025 for each free breakfast is automatically added as part of the Illinois Free Breakfast Program.

For severe-need schools participating in the Community Eligibility Provision, additional funding available if Gap to 70 was met = # of additional breakfasts to reach Gap to 70 X Free Claiming Rate X \$2.04 + # of additional breakfasts to reach Gap to 70 X Free Claiming Rate X \$.025 + # of additional breakfasts to reach Gap to 70 X Paid Claiming Rate X \$0.29

For non-severe-need schools participating in the Community Eligibility Provision, additional funding available if Gap to 70 was met = # of additional breakfasts to reach Gap to 70 X Free Claiming Rate X \$1.71 + # of additional breakfasts to reach Gap

to 70 X Free Claiming Rate X \$.025 + # of additional breakfasts to reach Gap to 70 X Paid Claiming Rate X \$0.29

For severe-need schools, not participating in the Community Eligibility Provision, additional funding available if Gap to 70 was met = # of additional breakfasts to reach Gap to 70 X % Eligible for Free Meals X \$2.04 + # of additional breakfasts to reach Gap to 70 X % Eligible for Free Meals X \$.025 + # of additional breakfasts to reach Gap to 70 X % Eligible for Reduced Price Meals X \$1.74

For non-severe-need schools, not participating in the Community Eligibility Provision, additional funding available if Gap to 70 was met = # of additional breakfasts to reach Gap to 70 X % Eligible for Free Meals X \$1.71 + # of additional breakfasts to reach Gap to 70 X % Eligible for Free Meals X \$.025 + # of additional breakfasts to reach Gap to 70 X % Eligible for Reduced Price Meals X \$1.41

Summer meal and After-school Programs

ISBE also provided all raw data on participation in the Summer Food Service Program (SFSP), the Summer Seamless Option (SSo), and the Child and Adult Care Food Program (CACFP).

Summer meal calculations include all meals and snacks provided through the Summer Food Service Program and the Summer Seamless Option within the months of May through September 2016 and 2017.

Participation in the Child and Adult Care Food Program At-Risk after-school looks at meals and snacks provided in October through May of 2017 only.

Limitations

SY16 meal data was only available for October 2015 – May 2016 for this analysis, therefore this report assumes September 2015 did not have a substantive difference in meal participation from the rest of SY16.

Sites that do not have a National School Breakfast Program are not reflected in this analysis.

¹ Public School Districts with Type Codes of 01-27 and State Charter Schools are included. Schools required to implement Breakfast After the Bell are those public schools in which at least 70% of the students were eligible for free or reduced-price lunches in October of the preceding year. Districts affected by Breakfast After the Bell are those public school districts that include at least one school required to implement Breakfast After the Bell.
